

Medicare Pager App

MED76

The Medicare pager app is a smart way to improve efficiency within your home. The alert can be set to either an audible tone, speech or silent within a quiet system. The app works with all systems that are configured to utilise the Medicare cloud interface via WiFi.

Operating Systems	Minimum requirement - Android 5.1 Android 8.0+ is recommended.
Required Hardware Specs	Minimum requirement of 1gb of RAM. Optional 4G data connection to support cloud messaging.
File Size	86.94MB
Power	Battery usage depends on the amount of calls active on system. Other apps running in the background will also affect the device's battery life.
Call Facilities	Call, Attendance, Accessory, Assistance, Emergency, Cardiac, Reminder, Fault and Reset.
