Medicare Cloud

The Medicare Cloud System provides secure access to your nurse call data through our cloud platform. Used in the Nursing and Residential environment, this powerful reporting tool supplies accurate call data analysis via a bespoke reporting tool providing evidential reports. All reports can be individually tailored, automated and emailed to selected recipients.

Enables remote access anywhere on devices including smartphones, tablets and desktops.

Provides you with the capacity to monitor trends and collect data to assist with compliance reports for CQC inspections.

Cost effective, with the ability to interface with both old and new systems.

Automated email reporting to support management requirements.

Bespoke detailed or summary reports including response times and attendance times.

Specific incident investigation and reporting tools.

Works efficiently with bespoke electronic care plans, packages and fee levels.

Self-checking system maintenance and service report.
